## Summary

Full-stack developer skilled in ReactJS and Laravel with hands-on experience delivering e-commerce, portfolio, and business websites. Strong in problem-solving, client communication, and building scalable web solutions

## Skills

**Front-end:** ReactJS, HTML, CSS, Bootstrap, MUI, Tailwind, Chakra-UI

**Back-end:** Laravel, PHP, MySQL, WordPress, REST APIs

**Other:** OOPs, Git/GitHub, Postman, ReactNative

## Projects

At my current company, I have worked on multiple **web-based application** (admin and customer panels) and several **courier/delivery management system**. My core responsibilities centered around developing and optimizing the **admin panels**, where I implemented **modular architecture, secure API integrating, role-based authentication** and **real-time data management features**. I collaborated closely with both front-end and back-end teams to ensure seamless communication between systems and efficient database interaction.

(Live project links have been provided below for each application I contributed to.)

- E-commerce Website, Divyatattva (Admin & Customer Panel) -
